## Introduction

Graanul Invest Group (“Graanul Invest” or the “Group”) is a producer of wood-based biomass pellets made from dry sawdust, wood shavings, wet sawdust, wood bark, woodchips and low-quality stemwood. The Group operates through a network of 12 pellet production factories globally (11 in the Baltics and one in the US) and has approximately 500 employees. Graanul Invest was founded in 2003 and is headquartered in Tallinn, Estonia.

In October 2021, Sustainalytics provided a Second-Party Opinion on the Graanul Invest Group Sustainability-Linked Financing Framework (the “Framework”) and assessed the selected KPIs as being relevant and material to the Group’s overall business and its sustainability objectives.<sup>1</sup> Graanul Invest issued a Sustainability-Linked Bond (SLB) under the Graanul Invest Group Sustainability-Linked Financing Framework, whose financial characteristics are tied to the achievement of a Sustainability Performance Target (SPT), reflective of the progress on a material sustainability-related issue for the Group. If the SPT is not achieved by the observation date set forth in the SLB’s documentation, an adjustment in financial characteristics will be implemented on the bond. The final observation date of the issuance is 24 December 2024, and reporting occurs annually, not later than 30 June of each year.

In June 2022, Graanul Invest engaged Sustainalytics to review the progress on the KPI and the achievement of the SPT as of the end of 2021.

## Evaluation Criteria

Sustainalytics evaluated Graanul Invest’s measurement of and reporting on its progress toward achieving its SPT, and its adherence to its reporting commitments with the following elements, as previously stated in the Framework:

1. Calculation and measurement of the KPI;
2. The reporting practice of the Group on the KPI; and
3. The progress toward achieving the SPT outlined in the Framework

Table 1 lists the KPI and SPTs agreed upon for the SLB.

**Table 1: KPI and SPT Description**

KPI	KPI Description	SPT 2024	Baseline year 2020
Reduction in grams of carbon dioxide emissions (scope 1, 2 and 3) per megajoule of green energy contained in the pellets produced (gCO <sub>2</sub> e/MJ)	The KPI is defined as the annual carbon emissions across Graanul Invest’s supply, production and sourcing chains (scope 1, 2 and 3) divided by the total energy (in megajoules) contained in the pellets produced.  Carbon emissions intensity is calculated as follows: gCO <sub>2</sub> e/MJ	Reduce gCO <sub>2</sub> e/MJ by 5% by 2024, compared to a 2020 baseline	7.08

## **Issuing Entity's Responsibility**

Graanul Invest is responsible for providing accurate information and documentation relating to the details of the KPI's calculation and performance.

## **Independence and Quality Control**

Sustainalytics, a leading provider of ESG and corporate governance research and ratings to investors, conducted the verification of Graanul Invest's SLB. The work undertaken as part of this engagement included a collection of documentation from Graanul Invest employees and a review of documentation to confirm the conformance with the agreed upon details of the SLB.

Sustainalytics has relied on the information and the facts presented by Graanul Invest with respect to the KPI and SPT. Sustainalytics is not responsible, nor shall it be held liable if any of the opinions, findings, or conclusions it has set forth herein are not correct due to incorrect or incomplete data provided by Graanul Invest.

Sustainalytics made all efforts to ensure the highest quality and rigor during its assessment process and enlisted its Sustainability Internal Review Committee to provide oversight over the assessment of the review.

## **Conclusion**

Based on the limited assurance procedures conducted, nothing has come to Sustainalytics' attention that causes us to believe that, in all material respects, Graanul Invest's measurement of and reporting on its progress toward achieving its SPT does not conform with its commitments in the bond document.

## Detailed Findings

In Table 2, Sustainalytics provides the details of its assessment that formed the foundation of the overall assessment.

**Table 2: Detailed Findings**

Criteria	Procedure Performed	Factual Findings	Error or Exceptions Identified
<b>Sustainability Performance</b>	Review of achieved progress on the KPI to determine if it is aligned with the SPT mentioned in the bond documentation outlined in Table 1.	Graanul Invest has achieved the SPT by reducing its scope 1, 2 and 3 GHG emissions per megajoule of green energy contained in the pellets produced (gCO <sub>2</sub> e/MJ) and reaching an intensity of 6.63 gCO <sub>2</sub> e/MJ. Please see Appendix 2 for more details.	None
<b>Reporting</b>	Review of the reporting practices to make and keep readily available up-to-date information relating to the SPT mentioned in the bond document.	Graanul Invest has confirmed that reporting on its progress on the KPIs will be made publicly available in its annual sustainability report and the verification will be published on its website. <sup>2</sup> Reporting will include other information, such as an illustration of the positive impact of performance improvement, an explanation of key contributing factors and any reassessment of the KPI or restatement of the SPT, chosen baseline or scope of the KPI.	None
<b>Calculation and measurement of KPI</b>	Review of Calculation and methodology used for KPIs.	Graanul Invest's approach to measuring the KPI is clear and consistently applied across the years under observation and on the historical performance as outlined in the Framework and in Appendix 1.	None

## Appendix 1: Graanul Invest Carbon Emissions Assessment Methodology

The following is a summary excerpt of the carbon intensity assessment methodology included in the Graanul Invest Group Sustainability-Linked Financing Framework and mentioned by Graanul Invest to Sustainalytics:

Graanul Invest's 12 factories undergo an annual Sustainable Biomass Partnership audit to verify their annual value chain GHG emissions input data. A third party then calculates the carbon balance of each factory based on the verified input data, in accordance with the requirements of the Renewable Energy Directive (RED II). Finally, the total weighted average GHG emissions intensity is calculated by Graanul Invest using the GHG emissions data and the respective annual production volumes from each factory.

## Appendix 2: Progress towards the Sustainability Performance Target

Factory	Production (t) 2020	GHG Emissions intensity (gCO <sub>2</sub> e) 2020	Production (t) 2021	GHG Emissions intensity (gCO <sub>2</sub> e) 2021
Imavere	310,763	4.64	313,732	4.45
Ebavere	109,756	14.46	101,269	4.76
Helme	205,195	4.32	207,186	4.08
Osula	366,672	5.97	334,250	5.48
Launkalne	268,680	5.90	275,251	5.61
Incukalns	329,716	5.32	296,039	5.81
Gulbene	182,462	5.95	188,469	6.05
Jaunjelgava	92,385	5.44	90,104	6.13
Jekabpils	190,730	5.79	171,668	6.13
Kraslava	184,451	5.64	172,988	6.28
Alytus	97,580	8.09	84,104	8.25
Woodville	313,324	15.31	270,083	15.78
<b>Weighted Average GHG Emissions (gCO<sub>2</sub>e)</b>	-	<b>7.08</b>	-	<b>6.63</b>

KPI	Baseline (2020)	2021	SPT 2024
Reduction in grams of carbon dioxide emissions (scope 1, 2 and 3) per megajoule of green energy contained in the pellets produced (gCO <sub>2</sub> e/MJ)	7.08	6.63	6.73
<b>Percentage Improvement</b>	-	<b>6.35%</b>	<b>5%</b>

## About Sustainalytics, a Morningstar Company

Sustainalytics, a Morningstar Company, is a leading ESG research, ratings and data firm that supports investors around the world with the development and implementation of responsible investment strategies. The firm works with hundreds of the world's leading asset managers and pension funds who incorporate ESG and corporate governance information and assessments into their investment processes. The world's foremost issuers, from multinational corporations to financial institutions to governments, also rely on Sustainalytics for credible second-party opinions on green, social and sustainable bond frameworks. In 2021, Climate Bonds Initiative named Sustainalytics the "Largest Approved Verifier for Certified Climate Bonds" for the fourth consecutive year. The firm was also recognized by Environmental Finance as the "Largest External Reviewer" in 2021 for the third consecutive year.
